This is the first rule because it applies to most of the others. Before your management approach can be effective, it must be consistent.

An Efficient Approach to Clustering in Large Multimedia Databases with Noise. Several clustering algorithms can be applied to clustering in large multimedia databases. The effectiveness and efficiency of the existing algorithms, however, is somewhat limited, since clustering in multimedia databases requires clustering high-dimensional feature vectors and since multimedia databases often contain large amounts of noise.

An in Depth analysis shows that RDM-based fault detection techniques are one of the most efficient approaches , . In RDM, the PV modeling enables to establish the threshold boundaries for the detection variables in an offline conditions , . In the present work, a simple and efficient method to detect and diagnose short and open-circuit faults ...

Being efficient does not mean that you accomplish more work in less time, ignoring the quality of work. Never compromise on quality. Employees need to concentrate on work not only to deliver results on time but also yield high quality output. An employee is said to be efficient only when he accomplishes assigned tasks on time, with minimum errors.

Consequently, high-efficiency perovskites are usually prepared in dry/inert environments, which are expensive and less convenient for scale-up purposes. Here, a new approach based on the inclusion of an in situ polymerizable ionic liquid, 1,3-bis(4-vinylbenzyl)imidazolium chloride ([bvbim]Cl), is presented, which allows perovskite films ...

In this article, the authors present an efficient, informed approach to HPLC column selection based upon complementary decisions regarding bonded-phase and particle physical characteristics. First, the authors used knowledge of the sample components, particularly molecular structure information, as a guide in choosing bonded-phase characteristics.

We test the single biasing simulation approach for the identification of the binding site with a coarse-grained model of the (001) face of cholesterol monohydrate—which is a much less efficient nucleant than phloroglucinol dihydrate: the (001) face of cholesterol surface forms ice with the mW model at  $T_{het} = 210$  K on unbiased cooling ...

RRT-connect: An efficient approach to single-query path planning Abstract: A simple and efficient randomized algorithm is presented for solving single-query path planning problems in high-dimensional configuration spaces. The method works by incrementally building two rapidly-exploring random trees (RRTs) rooted at the start and the goal ...

In this study, a facile and efficient approach to increase the magnetic property of metal-organic framework-5 (MOF-5) has been investigated. The basis of this approach is the encapsulation of cluster-oxygen composition (i.e. ZnO in MOF-5) during the synthesis process of MOF-5 to form [email protected] nanocrystals. Both MOF-5 and [email protected] were synthesized for comparison purposes ...

An Efficient Approach to Nondominated Sorting for Evolutionary Multiobjective Optimization. Abstract: Evolutionary algorithms have been shown to be powerful for solving multiobjective optimization problems, in which nondominated sorting is a widely adopted technique in selection. This technique, however, can be computationally expensive, especially when the number of individuals in the population becomes large.
