Interactive Sky Chart | Map Your Night Sky - Sky & Telescope

Constellation Map. Constellation maps divide the celestial sphere into 88 parts, known as constellations, helping astronomers locate stars and deep sky objects. The star constellations that can be seen in the night sky depend on the observer's location and season, and they change throughout the year. Out of the 88 constellations recognized by the International Astronomical Union (IAU), 36 are found predominantly in the northern sky, while the remaining 52 are located in the southern sky.

Celestial Maps

Powered by Heavens Above, our interactive viewer charts the night sky as seen by eye. The map includes the Moon, stars brighter than magnitude 5, the five bright planets (Mercury, Venus, Mars, Jupiter, and Saturn), and deep-sky objects that can be seen without the use of optical aid. How Do I Use the Interactive Sky Chart to Explore the Night Sky?

Map of the Constellations - In-The-Sky.org

Celestial cartography, uranography, astrography or star cartography is the fringe of astronomy and branch of cartography concerned with mapping stars, galaxies, and other astronomical objects on the celestial sphere. Measuring the position and light of charted objects requires a variety of instruments and techniques. These techniques have developed from angle measurements with quadrants and the unaided eye, through sextants combined with lenses for light magnification, up to current methods whic

Best Celestial Maps - The Spruce

Astronomical map, any cartographic representation of the stars, galaxies, or surfaces of the planets and the Moon. Modern maps of this kind are based on a coordinate system analogous to geographic latitude and longitude. Most modern maps are compiled from photographic observations made either from Earth or from space.

Google Maps

By definition, a celestial map is a key to the stars traditionally used to help astronomers see constellations and galaxies. But these days it's common to find vintage maps or artist replicas framed as home decor.

Bing: Celestial Maps

A celestial map by the Dutch cartographer Frederik de Wit, 1670 A star chart or star map, also called a sky chart or sky map, is a map of the night sky. Astronomers divide these into grids to use them more easily. They are used to identify and locate constellations and astronomical objects such as stars, nebulae, and galaxies.
