fuse relay box for sale | eBay

Clicking noise in your car's fuse box is caused by a relay that is turning on and off rapidly. This can be caused by a computer failure, resistance in the ground wire for the control side of the relay or high resistance in the power supply to the control side of the relay. To find out the source of the problem, you'll need to run some quick tests using a multimeter.

Understanding Automotive Relays | Installing Engine Relay

A relay does the same. It takes the incoming voltage and once grounded will send that voltage to other places. So lets just focus on what an automotive relays is. You will usually see 3, 4, and 5 prong relays. An automotive relay will be working with either a 12v or 5v signal. 12v, the standard of all automotives batteries, and 5v the standard for automotive sensors.
