Modeling the Dynamics of Life: Calculus and Probability ...

Concepts of modeling are covered, including describing a system, translating appropriate aspects into equations, and interpreting results in terms of the original problem. By understanding the concepts, students learn that the science is central and "solving" the equations is in some ways the least important step.

An agent-based approach is proposed to computationally model the dynamics of online review evolution. We draw insights from social science theories (e.g., social exchange, motivation, social self-efficacy, and social bonds theories) and empirical data from pconline.com.cn, a famous online IT community in China. The agent-based model allows a comprehensive and in-depth understanding of the complex operational processes of ORSs.

Modeling the dynamics of life (2005 edition) | Open Library

Writing for freshman and sophomore life science majors, Adler (U. of Utah) emphasizes modeling, interpretation of results, basic biological processes, and the integration of calculus with probability and statistics. The text features in-depth explorations of particular models; a wide variety of...
