Unified Communications for Enterprise | Consolidated

The biggest difference between the two communication concepts is the scope. Many VoIP solutions focus just on Internet-based calling, while UC focuses on company-wide communication. More times than not, the voice part of UC is powered by a VoIP platform.

What is VoIP (Voice over IP)? - Cisco

VoIP Versus Unified Communications. Unified communications (UC) systems offer more features and benefits than basic VoIP, yet many are still priced for small businesses. UC brings together all forms of communication, including voice, video, messaging and meetings, regardless of location, time or device. With UC, faxes, e-mail, and voicemail are all delivered to a single inbox.
